Wi-Fi Function

Download & Login

1. Using your smart phone, download the “Smart Life” App from Google Playstore or Apple Appstore.
2. Open the app and register an account using your phone number or e-mail address and login.

Adding Device

1. Connect your smart phone to your wireless network and turn on the Bluetooth on your phone (Select a 2.4Ghz Wifi Network)
2. Open the “Smart Life” app.
3. Enter the homepage of the “Smart Life” app and then click the “+” icon to add a device. The app will display two options, a manual addition and automatic discovery.
4. **Automatic Discovery:** When selected,

Filter Replacing

The filter replacement instructions will appear on the app when the filter needs to be replaced. Please use the original filter sold by the manufacturer. Do not use any other filter as they will not fit.

1. Before replacing the filter, make sure the machine is turned off. Pull the plug from the power socket and remove the rear cover and take out the filter.
2. Tear the protective film of the new filter and push it into the machine and close the rear cover.
3. After replacing the filter, plug in the power supply, turn on the machine and press the power off button for 5 seconds to clear the filter alarm and recalculate the filter life span.

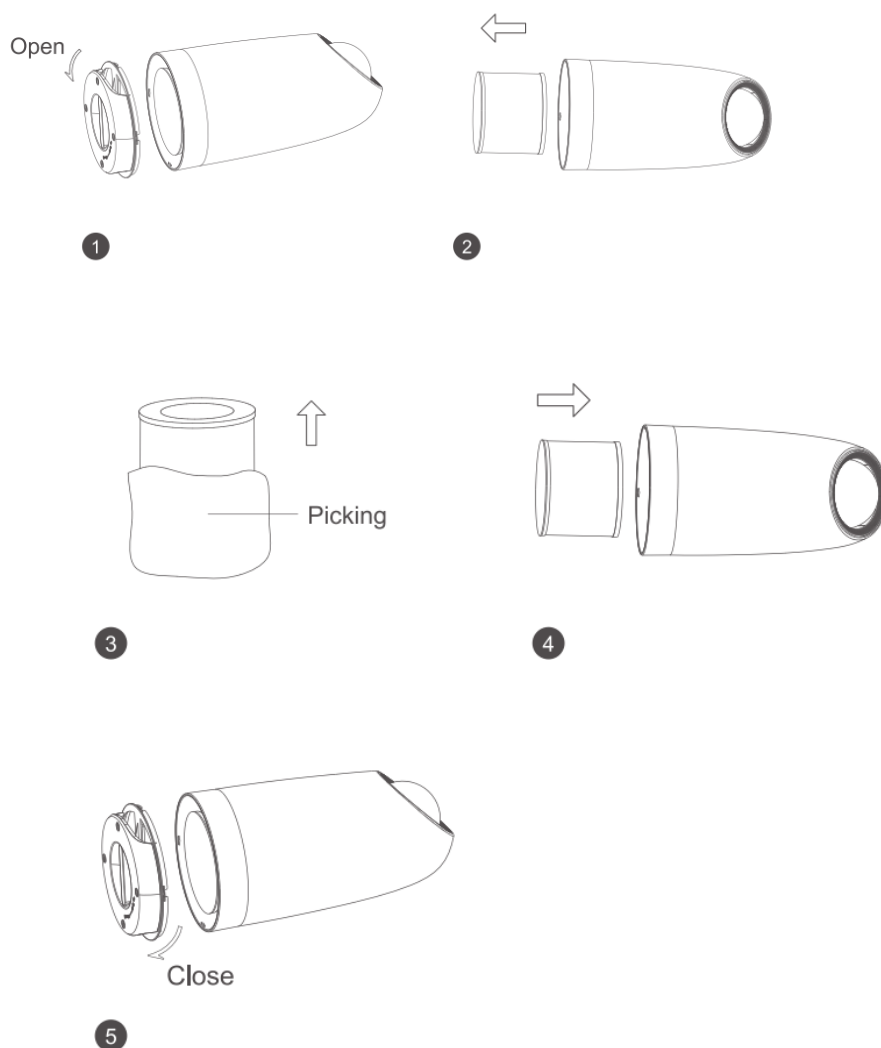

Note:

- Clean the dust on the filter regularly. The filter cannot be washed or reused.

- Before replacing the filter, turn off the machine and pull the plug off the power socket.
- Do not clean the filter with a vacuum cleaner.
- Put the filter in direct sunlight regularly to sterilize it.

Filter Installation

1. Remove the packing material of the filter before using. Make sure the air purifier is turned off before installing the filter.
2. Open the bottom cover by turning it in the direction of “open”.
3. Remove the filter and adapter.
4. Put the new filter into the air purifier.
5. Install the bottom cover to the air purifier, hold the handle and rotate to the “close” direction and tighten it.

Maintenance

1. Ensure that the machine is unplugged before maintenance.
2. Do not immerse the product in any liquid.
3. Do not use any abrasive, corrosive or flammable cleaners.
4. Do not wash the filter.
5. Do not use a vacuum cleaner to clean the filter.

Cleaning

1. Ensure that the machine is turned off and unplugged.
2. Take out the filter and clean the dust absorbed on the outer surface of the filter.
3. Use a soft cloth with a neutral cleanser to clean away any dust or debris from the surface of the machine and air inlet/outlet.
4. After the machine completely dries, put it in a cool and well-ventilated space.

Storage

1. Turn off the machine and unplug the power supply and bundle the power cord.
2. Take out the filter and clean the dust absorbed on the outer surface of the filter.
3. Clean the air inlet/outlet, wipe the body with a neutral detergent and a soft cloth.
4. After the machine is completely dried, put on a dust cover or bag and place it in a well-ventilated place not exposed to direct sunlight.
5. If you do not use it for a long time, turn on the machine for a few minutes from time to time to ensure peak performance.
